EDUCATION

National Institute of Technology Karnataka (NITK)

B.Tech in Information Technology

Surathkal, India

Aug. 2023 – Present

Shri Gujarati English Medium Hr. Secondary School

Higher Secondary (Class XII), CBSE

Raipur, CG

2022

Shri Gujarati English Medium Hr. Secondary School

Secondary (Class X), CBSE

Raipur, CG

2020

PROJECTS

VoiceViz | *React, TypeScript, FastAPI, Supabase* | [GitHub](#)

Feb. 2026 – Mar. 2026

- Developed a full-stack SQL analytics platform using React, TypeScript, FastAPI and Supabase
- Implemented authentication, protected routing and multi-user workspace management
- Developed voice-to-query functionality enabling natural-language database interactions
- Created interactive visualizations for schema exploration and query result analysis

AI Job Tracker | *Node.js, Express.js, MongoDB, CSS, EJS, Bcrypt* | [GitHub](#)

Jan. 2025 – June 2025

- Built an AI-powered career portal that centralizes job-application tracking and resume improvement in one dashboard
- Designed modules for managing professional profiles, technical skills, and work history
- Integrated Google Gemini API to generate personalized resume suggestions and keyword optimization for better ATS match rates
- Automated application-status tracking to reduce manual follow-up during a job search

Steg-Drop | *FastAPI, OpenCV, NumPy* | [GitHub](#)

Mar. 2026 – Apr. 2026

- Built a zero-knowledge steganography service in FastAPI that hides text or files inside images, processing everything in memory with nothing written to disk
- Implemented edge-adaptive LSB embedding using Canny edge detection so hidden data stays visually imperceptible in textured regions
- Secured payloads with AES-256-GCM authenticated encryption and PBKDF2-HMAC-SHA256 key derivation (100,000 iterations)
- Designed a modular three-phase architecture (crypto, stego, API layer) with REST endpoints for encoding/decoding and automated reliability tests

EXPERIENCE

Summer Research Intern

SPriT Lab, IIT Jodhpur

May 2026 – Present

Jodhpur, India

- Researching **Privacy-Preserving RAG** (Active) under Dr. Susil Kumar Mohanty, focused on securing Retrieval-Augmented Generation workflows for privacy-sensitive LLM applications
- Reviewed existing privacy-preserving methods to benchmark their trade-offs for RAG pipelines
- Synthesizing findings into a comparative analysis to guide the lab's next implementation phase

AI Training Freelancer

Scaler

Nov. 2025 – Jan. 2026

Remote

- Evaluated AI model outputs and annotated data across multiple projects to support model fine-tuning
- Generated structured datasets and metadata used to improve downstream model reliability

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL, HTML, CSS

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks

Frameworks & Technologies: React, Node.js, Express.js, FastAPI, Tailwind CSS

Databases: PostgreSQL, MongoDB, Supabase

AI/ML: PyTorch, OpenCV, Deep Learning, Computer Vision, Federated Learning, Split Learning, Retrieval-Augmented Generation (RAG)

Tools: Git, GitHub, Linux, VS Code

ACHIEVEMENTS

JEE Main 2023 – AIR 5427 among 1.2+ million candidates
